DANIEL ESTUPIÑÁN RAMOS

Software Developer | React | Next.js | NestJS | FastAPI | Node.js
Pereira, Colombia | danielestupinan0802@gmail.com | +57 305 4339035 | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Software Developer with 4+ years of experience building scalable web applications across the full stack. Strong frontend expertise in React and Next.js, combined with solid backend development using NestJS, FastAPI, and Node.js. Experienced in designing REST APIs, implementing authentication and role-based access control, integrating third-party services and payment gateways, and optimizing application performance end to end. Track record of delivering measurable results on large-scale SaaS and eCommerce platforms. Comfortable owning features from architecture to deployment, collaborating in distributed Agile teams, and contributing to technical decisions at every layer of the stack.

WORK EXPERIENCE

Senior Software Developer | **Omni.Pro (Remote)** | *June 2024 – January 2026*

Enterprise eCommerce solutions on Adobe Commerce Cloud for Kohler, Sportline, and Polar.

- Designed and implemented scalable frontend architectures and reusable component systems across multiple enterprise clients.
- Improved Core Web Vitals score from 62 to 91, reducing bounce rate by 18% through performance optimization, lazy loading, and caching strategies.
- Built an internal SEO metrics platform from scratch using React (frontend) + FastAPI (backend), enabling real-time performance tracking for the team.
- Collaborated with backend teams to design and consume REST APIs, ensuring consistent integration contracts and data reliability.
- Participated in architectural decisions and led technical improvements across active projects.

Senior Software Developer | **Stefanini (Remote)** | *September 2023 – January 2025*

High-traffic eCommerce platform for Movistar Peru with complex transactional flows.

- Reduced checkout load time from ~10 seconds to ~1.5 seconds by refactoring frontend render logic and optimizing backend service calls — a full-stack improvement with direct conversion impact.
- Architected and implemented custom checkout flows with complete happy/sad path handling across cart, address, shipping, and payment stages.
- Built a campaign module (modal/banner) fully manageable from the admin panel, eliminating developer dependency for marketing deployments.
- Led continuous UI improvements and feature development in coordination with product, design, and QA teams.

Full Stack Developer | **Corporación Talentum (Remote)** | *December 2022 – January 2024*

Educational data analysis platform — full ownership of frontend and backend from scratch.

- Built the frontend using React + Zustand with data-rich dashboards, reports, and statistics views for educational analytics.
- Designed and developed a REST API backend using NestJS + TypeORM with modular architecture (controllers, services, DTOs), ensuring scalability and clean code structure.
- Owned the full integration layer between frontend and backend — API contracts, data modeling, and type consistency across the stack.

Frontend Developer | **Aventi Solutions, Cali** | *March 2021 – August 2023*

eCommerce and web development projects across multiple clients.

- Implemented a custom Store Locator module and contributed to ERP integration via REST API endpoints.
- Supported payment gateway integration (PayU) across multiple projects, handling tokenization and transaction validation.

- Developed responsive, production-ready interfaces from UX/UI designs using JavaScript, HTML5, and CSS3.

PERSONAL PROJECT — ALLY360

All-in-One ERP + POS SaaS Platform — *Sole architect and developer, zero to production*

- Designed system architecture for a multi-tenant SaaS ERP: database modeling, API structure, authentication, and frontend component system — all decisions made and executed independently.
- Built the frontend with React + Zustand: role-based access control, modular components, and optimized performance for low-bandwidth environments.
- Developed the backend with FastAPI (Python) and NestJS, covering business logic, data layer, and transactional flows.
- Integrated Wompi payment gateway with full tokenization, PCI-compliant UX, and transactional validation.
- Delivered key product modules: inventory management, operational dashboards, customer flows, and POS interface.

TECHNICAL SKILLS

Frontend: React (Hooks, Suspense, SSR/SSG, Context), Next.js (App Router, ISR, Static Export)
Backend: NestJS, FastAPI (Python), Node.js, TypeORM, REST API design
Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3
State Management: Zustand, Redux Toolkit
Databases: PostgreSQL, MySQL/MariaDB (via TypeORM and SQLAlchemy)
Performance: Core Web Vitals, Lazy Loading, Code Splitting, SEO Optimization, Lighthouse
Integrations: Wompi, PayU, REST APIs, WebApi (Magento), third-party ERPs
Tools & Workflow: Git, Docker, Scrum/Agile, Figma, Composer

EDUCATION

Bachelor's Degree in Systems Engineering (In Progress)
Universidad Tecnológica de Pereira | 2022 – Present

CERTIFICATIONS

- Web Full Stack Developer
- React.js Introduction – Platzi
- Asynchronous JavaScript – Platzi
- Complete React & Next.js FullStack Course
